DIET in Sports and Physical Culture

TRAINING SECRETS

One of the great training secrets is the necessity for instant replacement of tissue broken down in exercise by concentrated and scientifically prepared foods.

No one "natural food" will do this quickly, but experience has proved that the most valuable nutritive qualities are those contained in cereals and milk.

The cereal part of the diet is most perfectly supplied in the form known as "VITA-WEAT" Crispbread.

"VITA-WEAT" Crispbread is made from the finest selected English Whole Wheat, rich in proteids and carbohydrates.

By reason of its special process of manufacture it is quickly and easily assimilated, while every particle is used both to strengthen the system and replace the used up tissue.

"VITA-WEAT" while being the ideal restorative, is of unrivalled value during the training prior to exercise, when the importance of correct diet as a factor in physical culture cannot be over emphasized.

See that your child gets an adequate supply of "VITA-WEAT." If the School Menu does not include it, the Tuck Box certainly should because boys and girls like it.

SCHOOLS OF ENGLAND

IF it be true that "the child is father of the man," England owes much to her schools. No country in the world has institutions comparable to the great Public Schools of Great Britain. Originally semi-monastic institutions for the early education of the Clergy, they have for centuries supplied and still supply every branch of the public service with notable leaders: judges and statesmen, generals and diplomatists, distinguished professional men and efficient Civil servants, pioneers of commerce and heroes of adventure.

These great foundations were originally six: Winchester College (founded 1387), Eton College (1440), Shrewsbury School (founded 1551), Westminster (re-founded 1560), Rugby School (1567), and Harrow School (1571); but the movement in secondary education, which took place in the "sixties," has elevated to Public School rank many old schools and some new ones whose traditions are already of the highest, and which have proved themselves worthy compeers of their famous prototypes.

Schools there are now in plenty providing sound teaching at fees which, in many cases, are far below the cost price of the education afforded: admirably equipped for the most part; efficiently staffed and served by a devoted body of scholars and gentlemen, to whose self-sacrificing labours, in and out of school, the conspicuous success of the English Public School system is due.

And yet few parents know what opportunities are within their children's reach; they are often content to let education run on in a haphazard way until it is time for their children to leave school, and then only do they discover that the child's future might have been far different if they had taken thought a year or two earlier in his career.

There never was a time in the history of English education when the "educational ladder" was more accessible or more easily scaled than at present. Humble birth and poverty offer no insuperable barrier to the diligent possessors of brains, however exalted their ambitions.

"Foreigners often ask me," said George Canning at an Eton dinner, "by what means an uninterrupted succession of

men, qualified more or less eminently for the performance of Parliamentary and official duties, is secured."

"First, I answer that we owe it to our system of Public Schools and Universities. From these institutions is derived (in the language of the prayer of our Collegiate Churches) a due supply of men fitted to serve their country in Church and State."

To most Englishmen this statement is of the nature of a self-evident proposition, but to some of our intelligent Continental critics, and to certain home critics of the "Little Englander" type, several objections to the present system present themselves.

We are told that our Public Schools turn out men all of the same pattern, that individuality can find no outlet for its energies; or, again, that our schools teach nothing at all of any commercial value. Nothing could be less true than hasty generalization of this kind.

It is to the happy combination of freedom and discipline that we owe the high ideals and lofty character of the best of our public school men.

Tradition and environment, and the close association of masters and boys, seem to produce, almost automatically, a standard of conduct to which any form of meanness is abhorrent. The boy, as he works his way up the school, gradually becomes master of himself: he learns in the playing fields to control his temper, and work for the good, not of himself, but of his cause.

When he becomes, in his turn, a Prefect, he finds himself with a wider sphere of conscious influence than he will have possibly at any future time of his career, and if he has learnt his lesson he can leave an impression on the lives of his juniors that no time can efface.

No training of this character can be lightly dismissed as of inferior value, even commercially speaking.

It is only possible, within the limited space available here, to indicate briefly some of those distinctive characteristics and some of those outstanding personalities which have through the centuries helped to create the "Public School spirit." But the instances afforded by the few famous schools concerning which some notes are given in succeeding pages can

be paralleled by many others provided by schools of more recent foundation or bearing less familiar names.

Of all our Public Schools, the pride of place belongs, naturally, to ETON. The School itself is a national possession. The man-in-the-street feels a sort of domestic,

though uncomprehending, pride in reading of its "wet bobs" and "dry bobs," of "Pop," of "Six-penny," and of the gay doings on the 4th of June. A school of a thousand boys appeals to him as a living force, for, as Lord Rosebery has said, "every day at Eton is instinct with the future life of the nation."

"Nothing on the Globe's surface," writes Mr. Cotton Minchin, "can surpass in beauty the Castle, the Chapel, and the River on a lovely 4th of June. If it be pleaded that the Castle and the River form no part of the School, it may be answered that they are as much part of the School as the

bloom is part of the peach. You can no more divorce Eton College from Windsor Castle than you can divorce Westminster School from Westminster Abbey."

In truth, the situation of the School is so delightful that it used to be the fashion to look upon it as a sort of Castle of Indolence; but since the repealing of the old statutes of Henry VI in 1872, and the multitude of reforms that have followed in the wake of the new statutes, Eton has raised the level of her mathematics, science and modern languages to the high place originally occupied, in splendid isolation, by the classics. All boys are introduced to science, and those who are so disposed can specialize at about the age of fifteen.

Four Senior Wranglers have come from Eton: Sir John Herschel, Sir John Shaw-Lefevre, Rev. Norman MacLeod Ferrers, late Master of Caius College, and Lord Rayleigh, F.R.S., and this at a time when Mathematics were ignored. One must, therefore, conclude that Mathematics—like murder—will out.

Our wise ancestors chose to place their great educational establishments on the banks of rivers, preferring as a means of approach a good river to a bad road—but Harrow, like Rugby, is an exception. The one outstanding feature of HARROW is its Hill, and its pride and hero Lord Byron, who qualified for his famous swim from Sestos to Abydos by his early devotion to the old "Duck Puddle."

Byron is much more to Harrow than Shelley is to Eton. The former was a more orthodox schoolboy, full of animal spirits—tradition says that he kept a bear at Trinity—and he was a boy to the day of his death at Missolonghi. Shelley was unhappy at school: he refused to fag, and he never reached the Sixth Form, so that, from the point of view of his contemporaries, he could hardly have been a success, though, on the other hand, he was a "wet bob," and walked as a full corporal at Montem, 1808.

"Harrow," said Lord Byron to Captain Medwyn, "has been the nursery of almost all the politicians of the day." Both Mr. Baldwin and Mr. Winston Churchill were educated at Harrow, and it has produced, and still produces, many famous soldiers.

"There is not a cleaner, a more healthy or a more comfortable spot in the King's dominions than the present COLLEGE OF WINCHESTER," writes Mr. Minchin. In the old days, when a scholar had eaten his meat off one side of his wooden platter, he would turn it over and eat his

pudding off the other ; but nowadays the old wooden platters are used only for breakfast and tea.

Winchester College, founded by William of Wykeham in 1387, has the oldest of all Public School Chapels, and shares with Eton its claim to the most beautiful one.

Its playing fields on the banks of the Itchen, given to the School by Dr. Ridding, a former Head Master, are probably the most beautiful in the kingdom.

It has maintained from Elizabethan days its reputation for accurate scholarship and sound learning, and, in common with all other Public Schools, small and great, its "modern "

subjects are now as efficiently taught as the classical "founts of learning."

William of Wykeham, who was also the founder of New College, Oxford, did probably more for Public School education than any educationalist before or since.

In medieval times boys went to the Universities at about the same age as they now enter the great Public Schools. The result was that they dropped the linguistic and literary study of classical authors at fourteen, and sometimes even at twelve. Scholarship gave place to philosophy. Homer retired in favour of Aristotle.

By fixing the leaving age of his foundationers at eighteen, or, if necessary, nineteen, William of Wykeham inaugurated a reform which has been copied by all Public Schools and which is the foundation of the Public School system.

WESTMINSTER SCHOOL suggests at once the name of Dr. Busby, whose muscular development must have been at least as noticeable as his intellectual powers.

"Dr. Busby! A great man! He whipped my grandfather: a very great man! I should have gone to him myself if I had not been a blockhead: a very great man!"

This is Sir Roger de Coverley's comment on the Busby monument in Westminster Abbey, and successive generations have celebrated his praise. Busby's bust, his chair, and the table in which he kept his rods, stand at the head of "Up School," and in the small Busby library, which he built, are still to be seen the actual books he used. Cowper, who was for eight years at Westminster, "excelled at cricket and football," and became, to use his own words, "an adept in the infernal art of lying," although this is naturally not an integral part of the curriculum.

Cowley, Dryden, Gibbon, Warren Hastings, George Herbert, Ben Jonson, Locke, Prior, Southey, Charles Wesley and Sir Christopher Wren were also O.W.'s.; and among recent *alumni* are Stephen M'Kenna and A. A. Milne.

After a period of temporary decay in the middle of last century, Westminster was restored to a leading position in classical learning and athletics under the headmastership of William Gunion Rutherford (1883 to 1901), who himself

was one of the few British scholars to gain European renown. The School has very valuable scholarships to Christ Church, Oxford, and Trinity College, Cambridge.

The School itself differs in many respects from its compeers as regards situation. It is hard to tell where the Abbey begins

SHREWSBURY SCHOOL.

Reproduced from one of a Set of Six Aqua-Etchings of Shrewsbury School by E. M. Holman.
(Ed. J. Burrow & Co. Ltd.—see page 62.)

and where the School ends. In a vaulted cloister we come upon a modest door—labelled “Gymnasium.” In a courtyard open to all passers-by, we find Fives Courts and Squash Racquets Courts. The School, indeed, seems to be one part School, one part Abbey, and one part London Town. It has a roll of distinguished sons that will challenge comparison with any school in England.

SHREWSBURY SCHOOL, founded in 1551 under the auspices of Edward VI, and enlarged in Queen Elizabeth’s reign, now occupies handsome buildings overlooking the Severn and Shrewsbury’s beautiful park, the Quarry. This is one of the few great schools still noted for classical scholarship, ranking in this respect with Winchester, Westminster, Eton, and St. Paul’s. Under its famous Head Masters,

Samuel Butler (1798-1836) and Benjamin Hall Kennedy (1836-66), Shrewsbury "swept the board" at Oxford and Cambridge. Its roll of *alumni* includes Sir Philip Sidney, Fulke Greville, Charles Darwin, and Archbishop Thomson. The presence of the Severn gives Shrewsbury a place among the rowing Schools. Numerous close exhibitions to the two older Universities are available for Salopians, including some to Christ Church, Oxford, and Trinity College, Cambridge.

RUGBY SCHOOL was founded in 1567 by Lawrence Sheriff, a native of the town who became a citizen of London and merchant grocer to Queen Elizabeth. The School had an endowment in the Metropolis which rose in value during the eighteenth century from £116 to £5,000 a year.

The School made its greatest stride forward and became one of the most famous of English Public Schools during the headmastership of Thomas Arnold, D.D., whose rule commenced in 1828. It was not simply a question of material advance in numbers of scholars; Dr. Arnold set little store by that, though it came as a consequence of his leadership. "It is not necessary," he once said, "that this should be a school of 300, or 100, or of 50 boys, but it is necessary that it should be a school of Christian gentlemen." The inspiring moral force as well as the intellectual power of this great head master have left indelible marks upon Rugby. His equally famous son, Matthew Arnold, the distinguished poet and prose writer, whose critical essays hold so high a place in nineteenth-century literature, spent part of his schooldays at Rugby.

And how could a school be other than famous which has given to England one of her best national games?

CHARTERHOUSE has flourished greatly since its removal from its old site, and since the government of the Hospital was separated from that of the School. The group of buildings is perhaps stately rather than beautiful, but its situation is magnificent. Charterhouse is known to the public as much for its footballers as for its scholars, and has won the Ashburton Shield ten times, although the Rifle Corps at Charterhouse dates only from its removal to Godalming in 1872.

General Lord Baden-Powell of Gilwell shot for Charterhouse at Wimbledon in 1874, 1875 and 1876, and was the sole representative of Charterhouse in Mafeking.

ST. PAUL'S SCHOOL was the nursery of John Milton and of John Churchill, Duke of Marlborough, whose names are inscribed in letters of gold on the Honour Boards of the School. Judge Jeffreys, of bloody memory, was also a Pauline. The old school of Dean Colet was destroyed in the Great Fire, and nothing survives of the earlier building but the bust of the founder, now preserved in the Governors' Room. St. Paul's was removed from the City to handsome modern Gothic buildings on a fine site at Hammersmith in 1884. The Head Master is styled the High Master.

The extraordinary progress of St. Paul's under the rule of Dr. Walker is well known, and need be but briefly referred to here; the School has produced a multitude of scholars.

MERCHANT TAYLORS' differs from the Schools already mentioned in its constitution. The School is not divided into Scholars and Commoners, and there is no endowment, and no boarding system is recognized by the School, although boarders are received by some of the assistant masters. Edmund Spenser, the author of the *Faerie Queene*, appropriately heads the list of Merchant Taylors' scholars. Lancelot Andrews, Bishop of Winchester, and the author of the *Devotions*, was also educated here, as was Juxon, the last Englishman to hold at the same time the offices of Bishop of London and Lord High Treasurer. He hunted a pack of hounds, and "was a person of great parts and temper, and had as much command of himself as of his hounds."

The greatest man of action that ever left Merchant Taylors' was Robert Clive. That he was also an orator we have the testimony of Chatham, who describes one of Clive's speeches in the House of Commons as the most eloquent he had ever heard.

In 1867 the Company transferred the School from Suffolk Lane to the former site of the Charterhouse, which had gone further afield to Godalming, and in its new quarters the School provides for 500 boys.

Naval and Military

NAVAL cadets may enter the service other than through the Royal Naval College, Dartmouth, provided they can comply with the official regulations. For appointments to Naval Cadetships (special entry) the Civil Service Commission hold annual examinations in June and November, the number of cadetships offered for competition being announced in the Press from time to time.

Applicants must be between the ages of $17\frac{1}{2}$ and $18\frac{1}{2}$ and must be British subjects of pure European descent and the sons of either natural born or naturalized British subjects. Before being admitted to the examination candidates must have produced School Certificate A or School Certificate B. The written examination is held in London and in certain other centres, of which a list may be obtained from the Secretary, Civil Service Commission, Burlington Gardens, London, W.1, from whom a syllabus of the examination may also be had. The fee for examination in London is £4, for examination in any other centre £5 plus, in some cases, a local fee payable to the School or College authority. The candidate is required to state when applying for entrance to the examination whether he wishes to enter the Executive Branch of the Royal Navy or the Engineering Branch; if willing to enter either, he must signify his preference.

In addition to the examination, there will be an interview and oral and practical tests; these, however, will take place in London only. All candidates satisfying the conditions, irrespective of their having or not having sat at a previous examination, must present themselves before a Committee which will sit at the Civil Service Commission, Burlington Gardens, London, W.1. Candidates who take the written part of the examination in London or at centres near London may be interviewed before the examination. Candidates from more distant centres are not usually interviewed before the written part of the examination. Marks are awarded by the Committee on the results of this interview and on the particulars received from the candidate's school relating to

his past training, abilities, conduct and general promise. The maximum total of marks to be gained is 400 ; candidates must gain more than 140 marks to secure admission.

A medical examination is held by the Medical Director-General of the Navy, even though the applicant may have been pronounced fit at some previous examination. Successful candidates must be able to show a certificate of ability to swim.

For the Army Entrance Examinations, candidates must qualify between the ages of eighteen and nineteen and a half. Application must be made to the Secretary, Civil Service Commission, Burlington Gardens, London, W. 1, for the necessary printed form of application for admission to the examination. Candidates must produce School Certificate A or School Certificate B. Examinations are held twice yearly.

Many of our leading Preparatory Schools make a special feature of preparing boys for entry into the Royal Naval College, Dartmouth ; and certain Public Schools specialize in giving preparation for the Army Entrance Examination. Special Training for entering the Merchant Navy is provided by H.M.S. *Worcester*, the particular object of which is to train Cadets for a seafaring life and exercise them in all the duties of a first-class ship. Special training is also provided by H.M.S. *Conway* and the *Mercury* School of Nautical Training. See announcements elsewhere in this book. Particulars of all such schools may be had from Burrow's Scholastic Agency (Manager, Mr. N. W. Ross, M.A., B. ès L.), 130 Regent Street (Entrance 4 Regent Place) London.

Specialized Schools

IN these days of specialization many Schools and Colleges have sprung up all over the country where young men and women desirous of specializing in particular subjects may obtain efficient and up-to-date training.

A special section has been devoted to the announcements of these institutions and further information may always be obtained free of charge from Burrow's Scholastic Agency (Manager, Mr. N. W. Ross, M.A., B. ès L.), 130 Regent Street (Entrance 4 Regent Place) London.

Public Schools for Girls

ONE of the most remarkable developments in modern education has been the foundation of Public Schools for Girls on the same lines as the Public Schools for Boys. In these Schools the monitorial system, which is traditional in boys' schools, has been introduced, and great attention is given to physical development and domestic economy. In the Early Victorian days the education of boys and that of girls had hardly any features in common, and speaking broadly, anything that was not to be rated as an "accomplishment" was stigmatized as "unwomanly."

We are told by some critics that our education of girls has lost its "atmosphere." For this we may be thankful. If we add up our gains and losses we shall find that our girls of to-day are distinctly healthier, more independent, and more capable of helping themselves out of a difficulty, than their forbears of fifty years ago.

We have now in our girls' schools a very strong *esprit de corps*. Most of the larger ladies' schools have flourishing Old Girls' Associations, and the range of teaching in all subjects is much the same as in boys' schools. There is among girls a greater conscientiousness: there is, therefore, a greater liability to over-work—consequently in many girls' schools the hours of study are confined to the morning, from 9 to 1, the afternoon being devoted to preparation, music, drawing, and callisthenics.

The pioneer in this good work was the late Miss Dorothea Beale of the Cheltenham Ladies' College,* to whose example may partly be ascribed the establishment of the Girls' Public Day School Trust, founded in 1872, its promoters being Mr. William Grey, the Dowager Lady Stanley of Alderley, Miss Gurney, Sir J. P. Kay-Shuttleworth, Bart., and others. The "G.P.D.S.T." has now twenty-five flourishing High Schools, educating about 9,300 pupils, with over 700 Staff Mistresses.

The Church Schools' Company, Ltd., was formed in July, 1883, to provide a sound general education for children

* See *In the Days of Miss Beale* by F. Cecily Steadman (Burrow) see page 428.

of the middle classes, including religious instruction in accordance with the principles of the Church of England. This Company now maintains eight schools in different parts of England, and educates about 1,500 girls.

The Church Education Corporation maintains three well-known public schools, and educates some 300 girls. (See page 302). The girls' schools of the Woodard Corporation at Abbots Bromley, Bognor and elsewhere provide chiefly for daughters of High Church parents. The Girls' School Company, a Scottish Body, maintains three important schools in Scotland. The schools maintained at Bedford by the Harpur Trust include two for girls, the High School and the Modern School, with about 1,000 pupils between them.

There are also many very notable independent Public Schools for Girls. Among these, besides the Cheltenham Ladies' College, may be mentioned Roedean School, Brighton; Wycombe Abbey School, High Wycombe; the Abbey School, Reading; Benenden School, Cranbrook; Channing School, Highgate; Farringtons, Chislehurst; Godolphin School, Salisbury; Princess Helena College, Ealing; Queen Margaret's School, Scarborough; Queenwood, Hatfield; St. Felix School, Southwold; St. Leonards School, St. Andrews; St. Margaret's School, Bushey; and Westonbirt School, Tetbury.

Of schools founded by the great London Companies, we have the Haberdashers' Aske's Acton School, accommodating about 600 girls; the Haberdashers' Aske's Hatcham School; the Coborn School, formerly the Coopers' Company's School, accommodating 350; while the Mercers' Company are trustees of St. Paul's School for Girls, which is on the foundation originally provided by Dean Colet, in 1509, and educates about 450 girls.

The Church of England High Schools in Upper Baker Street and Graham Street, founded by the late Canon Holland, offer education of the highest class at fees only slightly above the average; and other great London schools are the Frances Mary Buss Schools — the North London Collegiate School, founded 1850, which has now accommodation for 450 girls, and the Camden School, founded in 1871.

Private Schools for Boys and Girls

ENGLISH education owes a good deal to the many Private Schools scattered up and down the country. Private Schools are less circumscribed in regard to their curriculum than state-aided schools : classes are usually smaller, and eccentric or backward children have probably more attention paid to their idiosyncracies. The standard of efficiency in Private Schools has risen considerably within the last ten or fifteen years, and for this the Private Schools' Association is primarily responsible. This Association does everything in its power to represent the interests of efficient Private Schools, and it is recognized by the Board of Education for the purpose of consultation and the discussion of matters relating generally to Private Schools.

Of late years many Private Schools, on the general recommendation of the Association, have offered themselves voluntarily for inspection by the Board of Education, and, where "recognized" Private Schools exist, educational authorities have shown a disposition to avail themselves of the education thus offered rather than establish State schools, which might compete on unequal terms with the secondary education already provided.

In this way the action of both the Board of Education and the Local Authority tends to produce a higher standard of efficiency in schools maintained by private effort, and by the progressive force of public opinion it will become increasingly difficult for Private Schools that wish to be classed as efficient to refrain from offering their school for inspection by the Board.

Care should be taken in selecting a Private School to see :

- (1) That the qualifications of the teachers (degrees, diplomas, etc.) are adequate.
- (2) That the number and variety of teachers are sufficient for the number of pupils.
- (3) That the premises, apparatus for teaching, playing fields, etc., are suitable,
- (4) and chiefly, that the education offered is sound.

Private Schools for girls often give a very thorough training in Music, and the value of such instruction can be accurately gauged by results obtained in the examinations of the Associated Board of the Royal Academy of Music and Royal College of Music, the London College of Music, Trinity College, and the Guildhall School of Music.

It is impossible to particularize, but one may say, generally speaking, that competition raises the level of efficiency, and that in the twenty or thirty English towns which are known as "educational centres," the level of Private School education is very high.

Most of the Schools whose announcements appear in this book have been *personally visited* by us, and we have an intimate knowledge of the Best Schools and Tutors in the Country and on the Continent.

We shall be pleased to assist Parents in the choice of a School and to send *free of charge* Prospectuses and full particulars. Write in first instance to Burrow's Scholastic Bureau, Manager—Mr. N. W. Ross, M.A., B. ès L., 130 Regent Street (Entrance 4 Regent Place) London, giving age of pupil, district preferred, and approximate fees to be paid.

Finding a House

FOR those parents who desire to take up residence near the School where their children are being educated, invaluable information relating to over three hundred towns may be obtained at the offices of The Residential Centres Bureau, 130 Regent Street (Entrance 4 Regent Place), London, W. 1, or from the offices of any of the House and Estate Agents whose announcements appear in this book, commencing on page 644.

THE CHOICE OF A SCHOOL

OF all the duties which a parent has to discharge there are perhaps none for which the average man is less adequately qualified than those connected with the education of his children. The parent's difficulty is aggravated by the fact that on this subject trustworthy information and advice cannot easily be obtained. For a boy who is physically ill, a specialist can be summoned at a moment's notice ; in any legal matter the services of a highly trained lawyer are usually available ; but when the subtle and complicated questions relating to a boy's mental growth have to be dealt with, the average parent is generally unable to obtain any expert guidance, and he is often forced to adopt the solutions which are nearest to hand.

It is evident that books containing trustworthy information relating to schools serve a valuable purpose as a guide to parents. In this article the writer has endeavoured to supplement the information which is presented in such admirable form in this volume by a brief discussion of the considerations which a parent ought to keep in mind when choosing a school for his child.

Day and Boarding Schools

SCHOOLS of Secondary type may be divided roughly into two main classes—day schools and boarding schools—and in relation to these classes of schools parents fall naturally into three categories : those whose boys must go to a day school, those whose boys must go to a boarding school, and those whose circumstances allow them complete freedom of choice between day and boarding schools.

As to the first of these classes—parents whose boys must be sent to a day school—little need be said. Their problem is fairly simple. In many cases no question of choice arises, and, if a choice has to be made, local knowledge is usually a trustworthy guide. Moreover, the consequences of the choice

are not so vital to the boy as in the case of choosing a boarding school—partly because the boy is always under the parents' supervision, and partly because the master of a day school does not undertake such important responsibilities in relation to the boy as the master of a boarding school.

The second class of parents—those who are obliged to send their boys to a boarding school—includes those resident in India or the Colonies who send their boys home for their education, and those living in cheerless or unhealthy towns, or in the country far away from day schools. For three-quarters of the year, if not for the whole year, such parents must be relieved of nearly all their direct responsibility for their children, and must needs find a school where their boys can be educated, clothed, fed, and maintained in good physical and moral health. The task of selecting a boarding school is, therefore, one of the most difficult matters with which a conscientious parent has to deal. In a number of cases, it is true, tradition dictates that a boy shall be sent to a certain school. But the morale and reputation of a school is continually varying and circumstances may arise in which it would be rash to follow even a well-established family tradition.

The third class of parents consists of those who have to decide between a day school and a boarding school. In the ideal case, where the circumstances of the home are unexceptionable, where the boy can receive helpful supervision from his parents in his studies and personal difficulties, a great deal can no doubt be said in favour of day schools. Ideal homes, however, are comparatively rare, and if the admitted advantages of home life carry with them debilitating influences, such as richness of food, distractions in the evening, and what Bagehot has called the "contentious tenderness" of the domestic circle, it is usually best for a boy of good health and spirits to be sent to a boarding school, even if some financial sacrifice on the part of the parents is entailed. In the case of a boy of susceptible character or of weak health, the decision may be more difficult, but it should be remembered that though a boy of this character may suffer irretrievable harm in the rough and tumble of a public school, there are many good private boarding schools adapted to his special needs.

Characteristics of the Great Public Schools

OF the English boarding schools for boys, the most important are undoubtedly those which have been given the somewhat misleading title of "public schools." The external characteristics of these schools are few and definite. First, as explaining the title of the schools, there is the fact that the schools are nominally governed by a body whose members have no financial interest in the success or failure of the school, so that the schools are "public" institutions as contrasted with "private" institutions. The title of public school is generally confined to schools with a large proportion of boarders, who live in various "Houses" under the direct supervision of assistant masters. The ages of the boys are fairly evenly distributed between twelve to fourteen, the age of entrance, and eighteen or nineteen, the leaving age. The standard of living, and in consequence the school fees, must be fairly high.

Lastly, the schools have close relations with the ancient Universities of Oxford and Cambridge. A reasonable proportion of the boys on leaving proceed directly to one or other of these Universities, and the masters, with some exceptions, are Oxford, Cambridge or London graduates. Partly in consequence of these relations, the schools pay great attention to the teaching of the classical languages, Latin and Greek. The question how many English schools at present satisfy these requirements is not easily answered. In 1861 a Royal Commission inquired into nine specified leading public schools, seven of which—Eton, Winchester, Westminster, Charterhouse, Harrow, Rugby, and Shrewsbury—were boarding schools, and two—St. Paul's and Merchant Taylors', in London—day schools. By general consent, however, the number of public schools at the present time is several times greater, as there are many schools of comparatively recent foundation which socially, and in respect of the education given, are on a level with the older schools, though of course they lack the genuine traditions of the ancient foundations and their associations with great names of the past.

The Influence of Public Schools

THE external characteristics of the English public schools have been mentioned. It remains to speak of those more important characteristics which defy precise definition—their ideals of work and play, and the social and moral standards which they impress upon their *alumni*. In an article published in the *Revue pour les Français*, Baron Pierre de Coubertin, an acute and discerning Frenchman, who has become familiar with English life and manners from long residence in this country, ascribes the political stability of England to the public schools and the preparatory schools, which in his opinion are the true moulders of English political spirit. It is they, he says, which are in real touch with the country: it is they which have produced the characteristic English stability of ideas. Wherever the public school boy goes he carries with him and establishes, almost unconsciously, the social and moral code to which he has grown accustomed at his school. This code is a thing which descends unchanged from generation to generation. The gentleman is made by it. "I know no other definition of a gentleman than this—a gentleman is an Englishman made by the public schools."

If a boy at a public school does not make a large number of friends among his schoolfellows, he at any rate learns—and it is an important lesson—the character and modes of thought of those with whom he will have to deal in after life. He learns that cabinet ministers, judges and bishops were all in their embryo stage "small and pomivorous animals," and he will refuse to be duped in after life by "red robes and furs, cassocks and square caps." And if his life is spent in the great world of business or the turmoil of manufacture, the cloistered seclusion of his school, rich in its memories of the founder's zeal and devotion, and in its traditions of service to Church and State, must ever be to him an inspiration and delight.

Boarding Schools

THE principal consideration affecting the choice of a boarding school may now be mentioned. The question of expense concerns most parents. It should be remembered that the quality of the education provided in a school is not always directly proportional to the fees payable. The fact that some schools are richly endowed while others are poorly endowed would be sufficient to disturb any such simple ratio. From the educational point of view, or even socially, there may in certain instances be little to choose between a school in which the fees amount to £150 per annum, and another in which £100 per annum will cover all the expense. It should not be forgotten that extra expenses may amount to a considerable sum, depending on the character of the school, the amount of private tuition which boys usually have, the charges for special subjects, etc.

DISTANCE FROM HOME. In general it is not desirable that a boy should have to travel long distances at the beginning and end of each term. Most schools in consequence have certain territorial connexions, and, other things being equal, a school easily accessible from a boy's home is to be preferred to one more remote.

SCHOLARSHIPS. If a boy has more than average ability the number and value of the entrance and leaving scholarships which a school offers is a consideration of great importance. The larger schools are generally richer in these scholarships, but many of the smaller schools have valuable leaving scholarships tenable at Oxford and Cambridge and elsewhere.

Particulars of these Scholarships will be found in the section devoted to Public Schools.

HEALTH. It would be difficult to over-estimate the importance of the health record of a school. The character of the soil, the altitude and aspect of the school must all be considered, as also must the amount and kind of athletics.

RELIGION. The opportunity of selecting a school whose religious teaching is in conformity with that of the parents is to-day comparatively easy. The chief religious influences are

received through the chapel services or morning and evening prayers. Church of England schools of a broad type are perhaps in the majority. Religious teaching of more distinct types is given at schools established to maintain and inculcate the doctrines and faith of High Churchmen, Evangelical Churchmen, Roman Catholics, Congregationalists, Christian Scientists, Quakers, Wesleyans, Moravians, Jews, etc.

THE SCOPE AND QUALITY OF THE EDUCATION is a matter on which expert evidence should be obtained. It must be considered, if possible, in relation to the profession which a boy is to follow. Thus, some schools make a special feature of preparing boys for the Army. If a good scientific education is desired, inquiries must go further than ascertaining the existence of a Modern side. A school may have a Modern side with lavishly equipped laboratories, and yet the whole atmosphere of the school may be antagonistic to modern studies. Success in obtaining open scholarships at the Universities is a fairly good test of the quality of the highest training provided by a school. The age and reputation of the Head Master and the qualifications of the staff should also be taken into account.

SIZE OF THE SCHOOL. For a boy of more than average abilities a large school is to be preferred to a small school. A boy of only moderate abilities will probably receive more attention in a smaller school. The influence of the Head Master on the individual boy depends, not upon the size of the School, but upon the personality of the Head Master.

MORAL TONE. This is a matter concerning which parents are naturally most anxious, but it is very difficult to get trustworthy information in regard to it. Occasionally the moral tone of a whole school suffers corruption; but more frequently only one of the boarding houses in a school earns an unfavourable reputation. On the whole, however, the chance of moral contagion is exceedingly slight; and to-day serious moral offences are becoming less common in Schools now that the culprits are dealt with by means of sympathetic persuasion rather than by disproportionately harsh punishments.

Girls' Schools

WHAT has been said of boys' schools applies also to girls' schools. The old tradition that the education of girls should be chiefly concerned with what are known as the accomplishments—music, drawing, dancing, and deportment—is now almost extinct. It is difficult to believe that the revolution which has been effected in girls' education is of such recent date. The Royal Commission of 1865 reported on girls' schools in terms of strong condemnation, mentioning specifically the undue time given to mere accomplishments, the unintelligent and unscientific methods of teaching, etc.

Much of the credit of this change is due to the personal efforts of the late Miss Beale, of Cheltenham Ladies' College,* and Miss Buss, of the North London Collegiate School, and to the work of the Girls' Public Day School Trust and other companies which have established well-equipped and efficient day schools for girls in all parts of the country. The standard type of English education for girls to-day is that provided by day schools—generally called High Schools—in which the afternoons are left free for exercise and recreation.

There are, however, some boarding schools which in respect of size and character can almost challenge comparison with the chief modern public schools for boys; and parents are also offered a wide choice of smaller schools of more home-like character. In general it may be said that the educational efficiency in girls' schools, though it never reaches the highest standard of the best boys' schools, is more uniform than in boys' schools; it is also fairly obvious that women teachers exhibit greater earnestness, greater willingness to experiment in new methods of teaching, and greater enthusiasm for educational theories, than Public School masters of the average type.

During the last twenty years Burrow's Scholastic Agency has been accumulating specialized knowledge of Schools in this Country and on the Continent of Europe, which enables it to render invaluable assistance to parents in the grave responsibility of choosing schools for their children. This assistance is rendered entirely free of charge. Apply, giving age and sex of child, district preferred, and approximate fees to Burrow's Scholastic Agency, Manager—Mr. N. W. KINGWELL HALL, TIMSBURY, NEAR BATH.

Head Master : SYDNEY L. ALLAN, M.A. (Oxon).

Stations : Clutton (G.W.R., *via* Bristol), 1½ miles; Bath (G.W.R., thence by motor bus), 9 miles. Telephone and Telegrams : Timsbury 5.

KINGWELL HALL is a first-class Preparatory School for boys between the ages of six and fourteen years. The School is situated about nine miles S.W. of Bath, in a very beautiful and healthy district, nearly 600 feet above sea-level. The House stands in its own park of 240 acres, and commands extensive views of the Mendip Hills. The buildings are lighted throughout by electricity, and there is central heating in the principal rooms.

The grounds include good Cricket and Football fields, fine open-air swimming bath, two tennis courts, small golf course, boys' gardens, etc., and are eminently suited for all outdoor pursuits. The gardens, which are large, provide the School with fruit and vegetables all the year round. Plentiful supplies of fresh milk, butter, etc., are provided by the adjoining Estate Farm.

The hours of work are carefully arranged so as to secure for each boy plenty of open-air exercise. The classes are limited, the members of the teaching staff are specialists in their subjects, and much individual attention is secured for each boy. Six Public School Scholarships have been gained recently by Kingwell boys.

KINGWELL HALL—*continued*

If there is one point which has the Head Master's earnest care more, perhaps, than any other, it is that of the boys' health and general well-being. Fresh fruit is provided daily at breakfast time. After the mid-day meal the boys rest on their beds for an hour. It is the Head Master's considered opinion that a rest period of this nature is a necessity for the growing boy. The question of sleep is another important point, and the younger boys secure twelve hours sleep each night, while no boy has less than eleven hours. Each boy has a warm bath nightly before going to bed. Adequate arrangements have been made to ensure the regular cleaning of teeth, while special attention is given to all matters of personal cleanliness and hygiene.

A special feature is the daily course of Physical Training under a competent Instructor. These exercises (which include skipping, boxing, and breathing) take place every morning in the open air, and have been found of pronounced benefit to the boys in general, and to delicate boys in particular.

Bath and Bristol are both on the G.W.R., and there is a good service of trains to and from Paddington.

Prospectus and Book of Views may be had on application to the Head Master.

PROSPECTUS

plays a very important part in the life of the School. Many of the more progressive Schools have realized that the costs involved in producing a dignified and refined Prospectus represent investment rather than expenditure.

For many years we have specialized in the designing and printing of prospectuses which compel attention and secure pupils. It has always been our aim to study the Parents' point of view and to design the Prospectus in such a way that it shall adequately set forth the claims of the School and attract the Parent.

This edition of "The Schools of England" you are now perusing was produced and printed entirely at our Works, and we are continually receiving from Heads of Schools letters of thanks and appreciation for School Prospectuses and other School printing we have produced for them. The

SCHOOL MAGAZINE

although of necessity a less expensive publication needs to bear the stamp of dignity and refinement. We have always maintained that printed matter to be good need not necessarily be expensive. If the type is properly set and the right materials used, quite an inexpensive publication can be made to look well. Our skill and long experience in this direction is entirely at your disposal, and we suggest that you fill in one of the forms facing page 470 and let us give you a quotation entirely without cost or obligation.

ENDOWED 1674

Placed on Board of Education's List of Efficient Secondary Schools.

Head Master : MR. A. D. C. MASON, M.A. (Cantab.).

BUXTON COLLEGE is a School of ancient foundation, with established tradition and reputation, but is modern in its outlook and methods of education. Its endowment and management are controlled by a body of Governors. (Chairman: The Rev. Canon Scott-Moncrieff, D.D.)

It is most beautifully situated in its own extensive grounds. The clean mountain air of Buxton is ideal for boys, and the climate is not too severe, as is sometimes supposed. The boarders at the College have a remarkable record for health. Magnificent new buildings have been completed at a cost of nearly £24,000, and the College is now one of the most finely equipped in the North of England.

The College takes Day Boys, and a limited number of Boarders are received in the Head Master's house, adjoining the School buildings, where they receive the personal attention of the Head Master and his wife, aided by a qualified Matron. Very fine large airy dormitories with every convenience have been lately rebuilt in accordance with modern ideas. The admixture of Day Boys with Boarders creates, in the opinion of the Head Master, a healthier tone than is sometimes obtainable in schools which are limited to Boarders. Recognition by the Board of Education ensures a high standard of building, equipment and education.

The fees are strictly moderate, and the College should appeal to parents who wish their boys to have a first-class education in ideal surroundings, broad in outlook, practical in its results and economical in cost. The Governors control a fund for providing leaving scholarships to the Universities and other places of Higher Education.

Boys can be admitted to the College between the ages of eight and eighteen.

All-Graduate Staff of 12 Masters. Hard Tennis Courts. Covered Fives Courts. Shower Baths. 12 acres Playing Fields. Well-equipped Gymnasium. Fully equipped Stage. Fully licensed and inspected private cinematograph.

Your School

PROSPECTUS

plays a very important part in the life of the School. Many of the more progressive Schools have realized that the costs involved in producing a dignified and refined Prospectus represent investment rather than expenditure.

For many years we have specialized in the designing and printing of prospectuses which compel attention and secure pupils. It has always been our aim to study the Parents' point of view and to design the Prospectus in such a way that it shall adequately set forth the claims of the School and attract the Parent.

This edition of "The Schools of England" you are now perusing was produced and printed entirely at our Works, and we are continually receiving from Heads of Schools letters of thanks and appreciation for School Prospectuses and other School printing we have produced for them. The

SCHOOL MAGAZINE

although of necessity a less expensive publication needs to bear the stamp of dignity and refinement. We have always maintained that printed matter to be good need not necessarily be expensive. If the type is properly set and the right materials used, quite an inexpensive publication can be made to look well. Our skill and long experience in this direction is entirely at your disposal, and we suggest that you fill in one of the forms facing page 47c and let us give you a quotation entirely without cost or obligation.

PROSPECTUS

plays a very important part in the life of the School. Many of the more progressive Schools have realized that the costs involved in producing a dignified and refined Prospectus represent investment rather than expenditure.

For many years we have specialized in the designing and printing of prospectuses which compel attention and secure pupils. It has always been our aim to study the Parents' point of view and to design the Prospectus in such a way that it shall adequately set forth the claims of the School and attract the Parent.

This edition of "The Schools of England" you are now perusing was produced and printed entirely at our Works, and we are continually receiving from Heads of Schools letters of thanks and appreciation for School Prospectuses and other School printing we have produced for them. The

SCHOOL MAGAZINE

although of necessity a less expensive publication needs to bear the stamp of dignity and refinement. We have always maintained that printed matter to be good need not necessarily be expensive. If the type is properly set and the right materials used, quite an inexpensive publication can be made to look well. Our skill and long experience in this direction is entirely at your disposal, and we suggest that you fill in one of the forms facing page 470 and let us give you a quotation entirely without cost or obligation.

plays a very important part in the life of the School. Many of the more progressive Schools have realized that the costs involved in producing a dignified and refined Prospectus represent investment rather than expenditure.

For many years we have specialized in the designing and printing of prospectuses which compel attention and secure pupils. THE School is in fine open country thirty-six miles from London and provides a complete scheme of education for boys and girls from the age of entry (between five and fourteen) to the time when they enter their chosen career or the University.

The individual child is studied throughout the school with a view to seeing whether he or she is best helped by an examination course (which most children take) or by more general training. There are facilities for stressing arts and crafts, music, housecraft, etc. The emphasis is on the training of individuality for the service of the community, in the belief that individuality alone is not enough, nor is the common pattern of a common service—they should be combined.

The photograph above is of the Senior Boarding House and the School Library. Montessori, Junior and Senior Schools are organized separately with the staffing and accommodation appropriate to them and with the advantage for the Juniors of the assistance of specialist staff, the use of Laboratories, Gymnasium, etc. Football, Lacrosse, Cricket and Tennis are played and there is Swimming in the Summer. The organization of the Boarders is as far as possible on the lines of a large family and is under the care of MRS. LYN HARRIS, M.A. (Girton College, Cambridge).

For Prospectus, particulars of Scholarships, etc., apply to the Principal, H. LYN HARRIS, M.A., LL.B., (St. John's College, Cambridge).

BOYS & GIRLS

ELLALAND,

MILFORD-ON-SEA, HANTS.

HOME SCHOOL FOR CHILDREN. *Principal* : MISS EDITH AUKLAND.

MILFORD-ON-SEA is a delightful village near Lymington, Hampshire. The air is pure and bracing and admirably suited to growing children. Ellaland stands in about an acre of ground upon the cliff well sheltered from the winds.

There has been an increasing demand for Schools, where parents, whose circumstances call them abroad, may leave their children.

Children under 10 or 12 years of age are too young, and their general ideas too immature, to be deprived of a mother's care and the training of home and at the same time to be placed under the stricter discipline of school life.

For this reason some years ago this Home School for the little ones was established, where they receive the gentler training of home, and where everything is done to make up to them, as far as possible, for the temporary loss of home and parents.

At the same time school work forms a most important feature of the daily life. Lessons are carried on every morning with strict regularity, and the children are thus thoroughly prepared to enter the more advanced schools. Entire charge of children is taken if desired.

Examination successes are uniformly good.

Drill, gymnastics, swimming, tennis, hockey, netball, according to the season, are under the charge of a fully trained Games Mistress.

Excursions are arranged for visits to places of interest and beauty in which the neighbourhood abounds.

The pupils receive every possible care and attention and their health is the first consideration.

PROSPECTUS

plays a very important part in the life of the School. Many of the more progressive Schools have realized that the costs involved in producing a dignified and refined Prospectus represent investment rather than expenditure.

For many years we have specialized in the designing and printing of prospectuses which compel attention and secure pupils. It has always been our aim to study the Parents' point of view and to design the Prospectus in such a way that it shall adequately set forth the claims of the School and attract the Parent.

This edition of "The Schools of England" you are now perusing was produced and printed entirely at our Works, and we are continually receiving from Heads of Schools letters of thanks and appreciation for School Prospectuses and other School printing we have produced for them. The

although of necessity a less expensive publication needs to bear the stamp of dignity and refinement. We have always maintained that printed matter to be good need not necessarily be expensive. If the type is properly set and the right materials used, quite an inexpensive publication can be made to look well. Our skill and long experience in this direction is entirely at your disposal, and we suggest that you fill in one of the forms facing page 470 and let us give you a quotation entirely without cost or obligation.

SYDNEY LODGE, ST. LEONARDS-ON-SEA.

Principals : MRS. TONNELL. MISS HARVEY, B.A.

SYDNEY LODGE stands in its own grounds about 250 feet above sea level. The climate is bracing and healthy with a great deal of sunshine. The health of the girls is under the care of the Principals, one of whom is a trained and experienced Nurse, assisted by a lady Matron. Each girl receives individual care and attention.

The discipline is calculated to provide a training in such self-control and consideration for others as will best equip the child to meet the claims of social life in later years, and not merely to ensure the smooth running of the school by enforcing uniformity of behaviour. Great care is given to the development of Character and the fostering of a high tone among the girls. The aim is really happy home life with personal influence.

The Principals are prepared to take complete charge of pupils whose parents are abroad, and to make holiday time as much like home as possible. Out of school hours the comradeship of family life is the keynote of the School. There is a good School Library and the elder girls are encouraged to make use of the Principals' Library of reference books and books of general literature.

ÉCOLE NOUVELLE DE LA SUISSE ROMANDE.

Principal :

M. LOUIS VUILLEUMIER.

THIS is a Swiss School, situated at Chailly, Lausanne, and founded by a group of parents, so that their children might be prepared for Examinations in Switzerland. There is a limited number of Boarders, whose mother-tongue is English.

Pupils of other than Swiss nationality who desire to enter the School must therefore expect to adapt themselves to surroundings quite different from their own, and to accept the School's customs and rules accordingly. They will have the advantage of associating with Swiss schoolfellows and of hearing French constantly spoken, for all lessons in class are given in French.

Special classes in French are arranged for such pupils, who begin with spending much of their time in these, and gradually rejoin the regular classes as their progress in French enables them to do so with advantage. The stage when the change can be made in earnest is usually reached by the end of the second Term.

No lessons are given in English—apart, that is, from lessons taken in that language privately. Pupils who do not know French, and who do not remain more than a single year in the School, cannot follow the programme which they might have followed in their own countries. They will have gained the experience of a year spent abroad; they will have learnt French enough to help them throughout their school career, but if they wish to acquire a mastery of the language which will serve them for life they must remain two years at least. At the end of the first year, and during the second, they will be able to follow the regular curricula, and even to recover their ground in such subjects as may have been left in abeyance during the first year.

Many pupils have been prepared—either in the regular classes of the School, or in special private tuition given in English, either individually or in small groups—for the entrance examinations of English or American schools, or for the examinations of the College Entrance Board. The School organization is sufficiently flexible to allow many variations of programme.

Games of all kinds are played.
